

Background to latest correspondence with David Karoly

On 18th February 2014 I sent an email to David Karoly with Marjory Curtis, a retired geologist, as my co-signer. Approximately 180 Australian and overseas media outlets, politicians, universities, including their student newspapers, and prominent climate hysteria mongers were openly copied in. The many sceptics all over the world who are fighting to restore scientific integrity were not. It may have been a fortuitous oversight. The first letter and Karoly's immediate response are below.

We replied 21st February and added in our fellow sceptics. So there are now close to 220 observers for Karoly's next response. To date we have not heard back, but it is early days yet.

The public email is a powerful tool and there are many helpful tips on how to formulate and send them. The complete email lists are shown separately below. Feel free to copy, paste and use them, and if you have questions you only need to ask.
