We shall continue to respectfully but categorically disagree.

It may be that there is a dark global conspiracy involving, governments, meteorology organisations, universities, NASA and others to fabricate global temperature rises...or it may just be that the collective data shows progressively increasing average global temperatures.

Personally I support the second theory. While I disagree with you on the substance I have long advocated the importance of freedom of speech and others can pursue your beliefs and conclusions.

I am sure that you would agree that contestable freedom of speech is a bedrock of both a functioning democracy but scientific debate.

Regards

Greg

Dear Minister Hunt,

Thank you for your prompt response to our public email which can be seen at <http://www.galileomovement.com.au/docs/jr/ForwardTheEscapeRoute12.pdf> but is also shown immediately below.

As you can see from the links in our email below, the evidence indicates that you may have committed the crimes of Wilful Blindness and /or Malfeasance in Public Office when performing your fiduciary duties as Minister for the Environment. We are referring to the timespan from the 18th September 2013 around the time of the commencement of the Abbott Government, when you became Minister for the Environment, <http://www.environment.gov.au/minister/hunt/> up until after the date of September 24th 2015 when you, as Minister for the Environment, claimed credit on the ABC for killing the idea of a review the Australian Bureau of Meteorology and dismissing the possibility that there was any issue of data quality assurance associated with the Australian BoM (see 4th and 6th links in our email of 29th January below)

Minister Frydenberg was the Minister for Energy at that time. He became Minister for the Environment and Energy on 19th July 2016 [https://www.aph.gov.au/Senators\\_and\\_Members/Parliamentarian?MPID=FKL](https://www.aph.gov.au/Senators_and_Members/Parliamentarian?MPID=FKL)

This brief email addresses your three points below, particularly your second point To quote from your response " I would also note that in fact contrary to your statement there was a review of BOM data during the previous term of Parliament" We have not stated that there was no review, but that you removed terms 'due diligence' and 'data quality assurance' from the terms of reference.

In closing if there is anything we have said that you think is untrue please respond. It is important that you do as this letter may be used as evidence in a court of law.

Respectfully Yours

Dear Minister Hunt,

We sent the email shown below to you on the 8th December 2017. We gave you 21 days to take the appropriate ethical action and reopen the investigation into the BoM with the terms 'due diligence' and data 'quality assurance' reinserted into its terms of reference. Twenty-one days plus have passed and you have done nothing. Therefore, we now forward the email to you as a public email. The people of Australia and elsewhere can read the evidence and judge for themselves if you have performed your fiduciary duties appropriately, or whether you have committed crimes of 'Wilful Ignorance' and or 'Malfeasance in Public Office'.

Dear Readers, Please read the short succinct email below. To:  
Minister Greg Hunt,

Dear Minister Hunt,

We sent the email shown below to you on the 8th December 2017. We gave you 21 days to take the appropriate ethical action and reopen the investigation into the BoM with the terms 'due diligence' and data 'quality assurance' reinserted into its terms of

reference. Twenty-one days plus have passed and you have done nothing. Therefore, we now forward the email to you as a public email. The people of Australia and elsewhere can read the evidence and judge for themselves if you have performed your judiciary duties appropriately, or whether you have committed crimes of 'Wilful Ignorance' and or 'Malfeasance in Public Office'.

Dear Readers, Please read the short succinct email below.

=====

Dear Minister Hunt,

In the interests of openness and transparency we inform you that, although this email may be used in future as evidence in a court of law, nobody, except our chief legal adviser, is privy to its contents at this early stage. Therefore, you have an opportunity to avoid litigation. The evidence of fraud by the Lysenko-like pseudo scientists at the Australian BoM is robust:

[http://www.galileomovement.com.au/docs/jr/Rutherglen2015version\\_opt.pdf](http://www.galileomovement.com.au/docs/jr/Rutherglen2015version_opt.pdf)

<http://www.galileomovement.com.au/docs/jr/NonInteracticePosterForDecember1931.pdf>

<http://www.galileomovement.com.au/docs/jr/AtmosphericCO2LevelsFromThe1990s-2.pdf>

Maybe it is the BoM scientists who should be facing litigation?

Surely you are aware that, for a number of years, many people,

including Dr. Curtis and myself, have tried to alert you to possible fraudulent data manipulation practices at the BoM. The evidence indicates that you have willfully turned blind eyes and deaf ears to the evidence we provided.

Below is a brief history of your performance of fiduciary duties under the Abbott and Turnbull governments (circa 2014). The Abbott government called for a full enquiry into the BoM's data management practices. Terms of reference included 'due diligence' and 'quality assurance'. The evidence indicates that, as Minister for the Environment, you argued against an enquiry at that time:

<http://thenewdaily.com.au/news/national/2015/09/24/abbott-wanted-investigate-weather-bureau/>

The evidence also indicates that when you, as Minister for the Environment, were required to set up the public enquiry, you deceived and undermined Prime Minister Abbott and Cabinet (circa 2015). You set up the Technical Enquiry Forum but ensured that all references to 'due diligence' and 'quality assurance,' relating to the BoM's data management practices were removed.

Meanwhile hundreds of concerned citizens lodged submissions to the enquiry based on the BoM's questionable data management practice, its 'due diligence' and data 'quality assurance'. Is it possible that your due diligence was a little flawed at that time?

Dr Curtis' and mv submission were among the later submissions.

We lodged it on 4th March 2015 (Keyword search on Karoly)

[http://www.galileomovement.com.au/docs/jr/GregHuntSubmission\\_20150304.pdf](http://www.galileomovement.com.au/docs/jr/GregHuntSubmission_20150304.pdf)

As you can see, our submission provided the evidence that Professor David Karoly, whilst he was editor of the AMOJ, published a paper in that journal using data that, the evidence indicates, he knew had been maladjusted. In our opinion that meets the definition of fraud.

On 15th March 2015 there was a one day closed forum, which did not address the issues of due diligence and quality assurance by the BoM scientists.

September 14-15th 2015 saw Malcolm Turnbull oust Tony Abbott as PM.

Only 9 days later.....

September 24th 2015: You, Minister Hunt, on mainstream media claim credit for killing the idea of the enquiry.

<http://www.abc.net.au/news/2015-09-24/environment-minister-greg-hunt-killed-idea-of-bom-review/6803572>

Is it possible that by stopping the investigation into the BoM's data management practices you have become liable to a charge of malfeasance in public office?

We, the Independent Scientists are a cohesive, global organisation. We have the will and the wherewithal to commence litigation against you. Do you want to avoid this outcome? If so, confer with all your colleagues copied in to this email. Then take the appropriate ethical action. Within 21 days of receiving this email have the appropriate politician announce the reopening of the investigation into the BoM. Announce that the reopened investigation includes 'due diligence' and data 'quality assurance' in its broadened terms of reference. Announce it on the nightly televised news on both the Government funded and commercial channels.

Respectfully Yours

Dr Judy Ryan and Dr Marjorie Curtis
