

The Minister for Foreign Affairs,
Dear Minister Julie Bishop,

19th July 2015

With Graham Williamson's permission we are re-sending his recent email to Australia's Minister for Foreign Affairs, the Hon Julie Bishop. Graham has asked specific questions of the Minister, but has not yet received her response. We also are interested to hear her response.

We direct the Minister to Graham's extensive research into the issues that threaten Australia's sovereignty . http://www.galileomovement.com.au/australia_democracy.php

For a brief one page summary go here <http://www.galileomovement.com.au/docs/gw/AG21Flyer3.pdf>

We remind the Minister that the Abbott Government was overwhelmingly voted in on the understanding that his government would abolish the carbon tax and all its dysfunctional adjunct taxes.

So please DO NOT squander our hard earned money on 'donations' to the United Nations. Please DO NOT sign any agreement with the United Nations. In our opinion the evidence indicates that it may have a fraudulent ideology. Please protect our sovereignty from the threat of global governance by an unelected NGO.

http://en.wikipedia.org/wiki/Reagan_administration_scandals#EPA_scandals

The two evidence based graphics below show that at at very least the United Nations is coercing democratic nations into a divisive, futile competition to provide an unworkable solution for a non existent problem.

Read that again. **DRAWING NOT TO SCALE. If drawn to scale, neither the total carbon dioxide nor the alleged human-produced carbon dioxide would be visible!**

- **3 July 2013**

In findings based on satellite observations, CSIRO, in collaboration with the Australian National University (ANU), found that this CO₂ fertilisation correlated with an **11 per cent increase in foliage cover** from 1982-2010 across parts of the arid areas studied in Australia, North America, the Middle East and Africa, according to CSIRO research scientist, Dr Randall Donohue.

In closing we reiterate, we are three senior citizens expressing the opinion we formed as a result of our own research. If there is anything we have said that you think is untrue please state our inaccuracy and we will openly consider it and either apologise and rectify our error or explain

further. In the spirit of caring for our environment whilst preserving and strengthening Australia's democracy we look forward to engaging with you. ...
