Ms Michelle Guthrie
Director of the ABC

Dear Ms Guthrie

We are writing to state why we think that the ABC is a threat to Australia's democracy.

The ABC states it protects its independence, but independence for the ABC is a misnomer. Individuals in a democratic nation use their vote to elect a government which is attentive to that individual's concerns. In 2013 the vast majority of Australians voted for the Liberal Party's Tony Abbott as Prime Minister, mainly because he recognised that Human Caused Global Warming was a scam and was not afraid to call it such.

Therefore, the publicly-funded ABC should have reflected the elected Government's views in a balanced and accurate manner. It has failed to do this to the extent that it has undermined Australia's democracy and is possibly in breach of the law.

The public record that supports our view is:

On December 5th 2013 we wrote to the then ABC Director Mark Scott and stated a deadline of 21 days for the ABC to correct its biased reporting.

In that letter we informed Mr Scott that we had delivered the same opportunity to Professor David Karoly earlier in the year.

Neither Professor Karoly or Mark Scott responded to the deadline. It appears they both continued to collaborate together to propagate misinformation to the Australian people.

Therefore, it is our humble opinion that the evidence indicates that Professor Karoly has been knowingly complicit in one of the greatest academic funding frauds of all time. The evidence also indicates to us that Mark Scott, as the then Director of the ABC, was at that time guilty of malfeasance in public Office.

Mark Scott has since moved to the upper echelons of the NSW Department for Education and the evidence implicates him in a top-down blocking of science proving the null hypothesis for 'Climate Change'. The NSW Ombudsman is now reviewing that evidence for the second time for bias. Proven intentional bias may be deemed academic fraud, while malfeasance in public office is certainly an indictable crime.

We had hoped that the ABC may have become less socialistically biased under your directorship, but apparently not. The latest incident we refer to is the alarmist documentary by Professor Will Steffen. As he detailed the temperature record of the last century he failed to mention that during the 1970's scientists, via the mainstream media, were stating that human-caused global cooling would occur
<http://www.galileomovement.com.au/docs/jr/GlobalCoolingAlarmismInThe1970s.pdf>

We had hoped that the ABC might have become less socialistically biased under your directorship, but apparently not. The latest incident we refer to is the alarmist documentary by Professor Will Steffen. As he detailed the temperature record of the last century he omitted to mention the cooling phase that occurred during the 70's. The historical record shows that

scientists via the MSM were actually stating that human caused global cooling would occur
<http://www.galileomovement.com.au/docs/jr/GlobalCoolingAlarmismInThe1970s.pdf>

This kind of systemic Climate Alarmism reporting, via the ABC, clearly misinforms its listeners. In our opinion the ABC is wilfully or recklessly reporting subversive, dangerous propaganda.

In conclusion, if there is anything we have said that you think is untrue please inform us. We will investigate and if necessary correct our error. It is important that you do, as this public letter is evidence that may be used in a court of law.

Respectfully Yours

As truly independent scientists we will always debate the Science. However, we are united in our recognition and rejection of the politically driven post-normal science (such as climate alarmism)
