## Carbon Tax Corruption Scandal: Part 3 – Real World Science

## (Care-Core-Cure)

http://www.galileomovement.com.au/docs/freedom1 -CO2.pdf two (2) short pages 1 & 2 and pages 3 & 4 provide supporting facts.

In our first video we established that people care. In our second video we started to explore how core understanding of the science has been compromised by a deep and extensive rigging of climate science.

It's clear. Contrary to what the government is telling us, there's no scientific consensus attributing global warming to carbon dioxide. There's no scientific evidence for the government's claim. The basis for government climate policy is political reports driven by a political agenda that reverses and deliberately manipulates science. Misrepresentations of science are promoted by people benefitting financially from spreading climate fear.

In this video we'll continue to explore the core issue by understanding basic facts on carbon dioxide. These facts are widely agreed on by those spreading global warming fear and by sceptics.

Carbon dioxide is Nature's colourless, odourless, tasteless gas. Essential for all life on Earth, including us. Trees need CO2 to live. Crops need CO2 to live. We need trees and crops. You're exhaling CO2 now. It's not poisonous. Calling it pollution is a ... lie. <a href="http://icecap.us/images/uploads/Note\_to\_the\_Admin">http://icecap.us/images/uploads/Note\_to\_the\_Admin</a> istration so.pdf

A lie is knowingly or recklessly stating something that is not true creating a false or inaccurate impression.

CO2 is less than 0.04% of Earth's air. Less than 4 x 1/100<sup>th</sup>'s of one percent. It's called a trace gas because there's bugger-all of it. Calling it pollution is a ... lie.

Of Earth's annual production of carbon dioxide human activity (all industry, transport, mining, agriculture) produces just 3%, Nature 32 times more, 97%. Calling it pollution is a ... lie.

Of that 3% from humans, Aussies produce just one hundredth. One percent of the 3%. That's 0.03% of Earth's annual CO2 production. Saying Aussie CO2 affects global climate is a ... lie.

The variation alone in Nature's production of CO2 is estimated to be four times the entire human production. Our CO2 is not affecting Nature's balance. It cannot. Calling it pollution is a ... lie.

When Nature's 97% is known to be essential for all life on Earth, how can 3% be catastrophic? It cannot. It is not. That's insane. Crooked. Calling it pollution is a ... lie.

CO2 stays in the air only 5-7 years, sometimes just months. Nature rapidly cycles it back into plants, animals and oceans. Calling it pollution is a ... lie. <a href="http://video.google.com/videoplay?docid=52063832">http://video.google.com/videoplay?docid=52063832</a> 48165214524 and references cited therein

71% of Earth's surface is ocean. Ours is a blue planet.

Oceans contain, in dissolved form, 50 times the CO2 in Earth's entire atmosphere. CO2 is released from and absorbed into the oceans according to temperature. Calling it pollution is a ... lie.

Annually, Nature overwhelmingly produces most of Earth's CO2. And Nature alone determines the amount in air. Saying human CO2 determines CO2 levels is a ... lie.

Measurements of global CO2 levels used by the UN reveal that CO2 levels are a result of temperature, not a cause. CO2 does not drive temperature. Temperature determines global CO2 levels. Yet the UN, the government and Greens tell us the opposite. Reversing Nature. Reversing science. Saying CO2 drives temperature and climate is the biggest ... lie. <a href="http://www.galileomovement.com.au/science\_futility.php">http://www.galileomovement.com.au/science\_futility.php</a>

And:

Professor Murry Salby's lecture at:

http://www.thesydneyinstitute.com.au/podcast/globa l-emission-of-carbon-dioxide-the-contribution-fromnatural-sources/

Each molecule of carbon dioxide combines an atom of carbon with two atoms of oxygen. Referring to Nature's invisible gas as 'carbon pollution', a black solid is a ... blatant lie.

Are you aware the UN deliberately omitted 90,000 reliable measurements of CO2 levels taken in the past 180 years? These reveal natural fluctuations up to 40% above current levels. The UN, avoiding the evidence.

Alarmists claim water vapour feedbacks enhance warming. Yet water vapour often helps Earth's surface shed heat to space. Measurements in the real world reveal Nature's feedbacks tend to modulate and counter or reverse initial impacts.

Water is the only material on Earth that can be a solid, liquid and gas at the same time. If there wasn't so much of it, perhaps many more people would study it. The ignorance of water vapour in understanding climate is a huge hole. Clouds, snow, rain, latent heat, ice, ...

('Slaying the Sky Dragon' book by an international team of scientists and authors)

Do you know that the only reliable measures of global atmospheric temperature are by weather balloons and satellites? These reveal no net warming, just inherent variation in Nature's cooling, warming, cooling cycles. Climategate: tampering with data, withholding data, hiding evidence.

Ask yourself "why?" as you check data for yourself at our web site, galileomovement.com.au

Given the money, the billions in research grants; the academic careers, reputations and egos being fabricated and manipulated for personal gain, this is fraud.

(Fraud is defined in the dictionary as the presentation of something as it is not for personal gain.)

There is no evidence humans caused the entirely natural cooling, warming, cooling cycles. The core, the UN's climate body, is rotten ... It's rotten to the core.

http://www.galileomovement.com.au/docs/freedom\_exposing.pdf

Globally, carbon dioxide levels in air are a result of temperature, not a cause. Carbon dioxide is not polluting our atmosphere or climate. It is Nature's trace gas essential for all life on Earth.

Water vapour is not a magnifier of warming. It is a modulator of temperature variation.

There is no net warming. Just Nature's natural variation driven by El Nino cycles. And the sun.
