**With lectures given by ‘climate experts’ to people who ‘want to do the right thing’ being told that:**

- ▶ Climate change is happening faster than we thought.
- ▶ More destructive hurricanes are developing; devastating fires burn on every continent except Antarctica; the ice is melting and sea-level rise is accelerating – threatening island nations, major cities, and coastal areas.
- ▶ Water supplies are shrinking in many parts of the world and droughts are threatening farms, livelihoods and food security.
- ▶ The ocean is warming and becoming more acidic, destroying coral reefs and harming fish populations.
- ▶ Record-high temperatures are making many parts of the planet unlivable, and the number of climate refugees is growing rapidly.

## *Should You Really Be Alarmed About The Climate?*

Are you worried about this? Perhaps there is some good news; so check things out for yourself!

**So now, perhaps consider this piece of wisdom:**

There's a very old saying:

***“Good news does not sell newspapers!”***

And, as Mark Twain quipped so accurately:

*Mark Twain*  
American author and humorist  
1835 – 1902

“If you don't read the newspaper, you are uninformed. If you do read the newspaper, you are misinformed.”

So, it's unlikely that you will read/see/hear a report from the Media that says:  
***“The Sun is shining, the grass is green, the birds are singing; so it's a nice day!”***

## *Should You Really Be Alarmed About The Climate?*

Are you worried about this? Perhaps there is some good news; so check things out for yourself!

There's this witty & accurate observation by Upton Sinclair in 1935:

*“It is difficult to get a man to understand something when his salary depends upon his not understanding it.”*

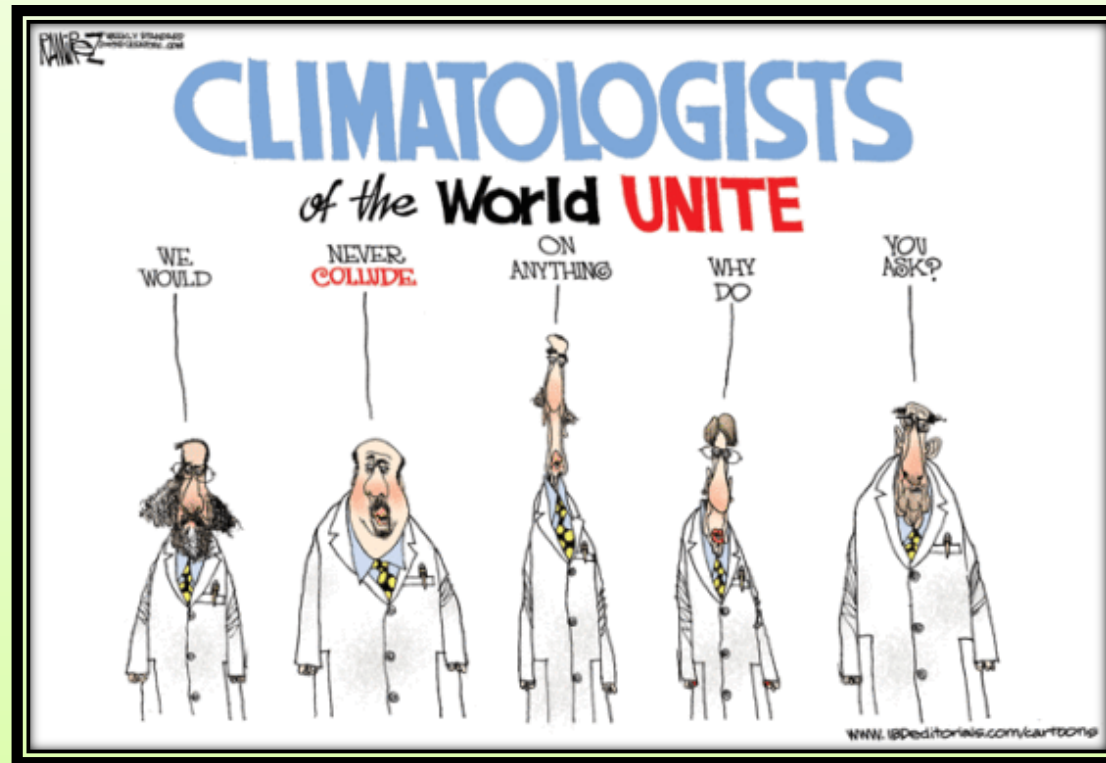

Shouldn't that be the 'politically-correct' "97%"?

## *Should You Really Be Alarmed About The Climate?*

Are you worried about this? Perhaps there is some good news; so check things out for yourself!

Now consider what Johann Wolfgang von Goethe said back in the 18<sup>th</sup> Century:

*“Most men only care for science so far as they get a living from it; and that they worship even error, when it affords them subsistence!”*

Do you think that human nature might have changed since then?

And yes!

There have been a lot of changes since Goethe's time....

In the 1970s it was '*global cooling*' that was the supposed threat.  
Then, in the late 1980s/1990s it suddenly became '*global warming*'.  
And then, miraculously, it has become '*climate change*'! (*Why?*)

## *Should You Really Be Alarmed About The Climate?*

Are you worried about this? Perhaps there is some good news; so check things out for yourself!

And now, a revealing statement from Paul Watson, a co-founder of  
'Greenpeace' could partly explain 'Why' ....

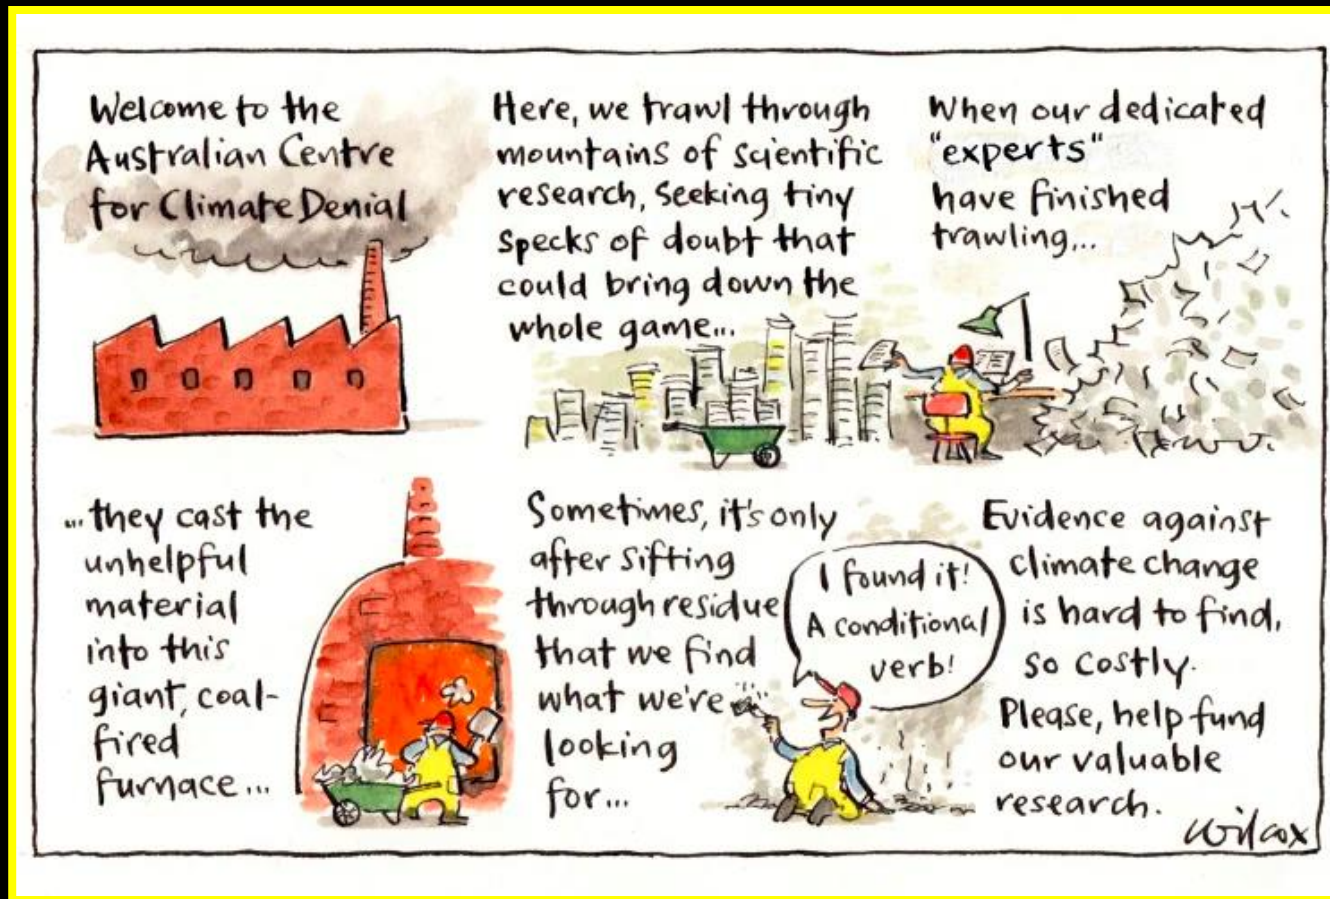

***“IT DOESN'T MATTER WHAT IS TRUE, IT ONLY  
MATTERS WHAT PEOPLE BELIEVE IS TRUE!”***

You couldn't say fairer than that:  
Now, could you?

**97 out of 100 climate experts agree:  
~~Humans are causing global warming.~~

But now, consider this profound statement about what REAL science is:

The greatest scientists in history are great precisely because they broke with the consensus. There is no such thing as consensus science. If it's consensus, it isn't science. If it's science, it isn't consensus. Period.

### U.N. Predicts Disaster if Global Warming Not Checked

PETER JAMES SPIELMANN June 29, 1989

UNITED NATIONS (AP) — A senior U.N. environmental official says entire nations could be wiped off the face of the Earth by rising sea levels if the global warming trend is not reversed by the year 2000.

Coastal flooding and crop failures would create an exodus of "eco-refugees," threatening political chaos, said Noel Brown, director of the New York office of the U.N. Environment Program, or UNEP.

He said governments have a 10-year window of opportunity to solve the greenhouse effect before it goes beyond human control.

As the warming melts polar icecaps, ocean levels will rise by up to three feet, enough to cover the Maldives and other flat island nations, Brown told The Associated Press in an interview on Wednesday.

*'environmental  
official'* means

And this prophesy of  
doom was made **over
